

```
SELECT *  
FROM my_database.my_schema.my_iceberg_table AT (SNAPSHOT => '1234567890123');
```

Here, ``1234567890123`` is the snapshot ID. Replace it with the actual snapshot ID you want to query.

### 3. Selecting Data as of a Specific Timestamp:

To query data as of a specific timestamp, use the ``TIMESTAMP`` keyword with the desired timestamp.

sql

 Copy code

```
SELECT *  
FROM my_database.my_schema.my_iceberg_table AT (TIMESTAMP => '2023-07-15T12:34:56Z');
```

Replace ``2023-07-15T12:34:56Z`` with the desired timestamp.

### 4. Listing Snapshots:

To list all the snapshots of an Iceberg table, you can use the ``TABLE\_HISTORY`` function.

sql

 Copy code

```
SELECT *  
FROM TABLE_HISTORY('my_database.my_schema.my_iceberg_table');
```
